ABOUT US

Training the Olive way

From our purpose built safety training centre, Olive Safety run an extensive range of safety training courses which help to maintain a safe and healthy work environment. Our accredited H&S consultants train the courses with the view to making it an informative and enjoyable experience. Olive Safety also facilitate companies who wish to train their personnel on site. We customise and personalise safety consultancy courses tailored to the requirements of our clients. Olive Safety's Training Centre is situated in a state of the art premises in the Red Cow Business Park which include several training rooms with full AV equipment. Our safety training centre itself was chosen based on ease of location as it is a three minute walk from the LUAS Red Cow stop and it is easily accessible from both the M50 and the Naas dual carriageway.

SAFETY MANAGEMENT

The Olive Approach

Olive Safety's consultancy team has worked for some of Ireland's leading private sector organisations, several of Ireland's larger Government Departments as well as hundreds of SME's with a handful of employees. Here at Olive Safety, we make no distinction in terms of the quality of service offered to our clients.

Olive Safety sets itself apart by not just offering a basic Health and Safety service for your business but offering you a full holistic solution. We work closely with the management of both small and large companies to develop and implement their Health & Safety Management by a process of integration, communication and training. With offices in Dublin, our consulting division can cover all areas of Ireland and can offer our clients a wealth of experience in designing solutions to meet their Health and Safety requirements.

Why Choose Olive Consultancy?

Committed

We are fully committed to our reputation of providing the highest standard of Health and Safety Consultancy and Training services to our clients.

Unique

Our philosophy to Health and Safety Risk Management is being able to offer our clients a "one-stop-shop" in Health and Safety management. Our unique portfolio provides a diverse range of services to cater for all health and safety issues.

Efficient

Health and Safety decisions often need to be made quickly and competently. As a client of Olive Safety's, you are assigned a Health and Safety advisor, dedicated to addressing any difficulties that may arise.

Supportive

Furthermore, our customers are given access to extensive an Health and Safety Information Centre for advice on any issue. Our centre is open 9-5, six days a week for all your Health and Safety training needs.

Audits and Safety Statements

At Olive Safety, we can provide a comprehensive workplace auditing service to ensure that your business is compliant with current legislation and best practice. On completion, a report is compiled setting out hazards and associated risks and recommended solutions to the problems identified. Our consultants can perform a one off workplace audit or if preferred, a continual service over an extended length of time. Dependent on your needs, Olive Safety will sit down with you in partnership and tailor the consultancy to your requirements. Olive Safety's consultancy team has worked for some of Ireland's leading private sector organisations and Government Departments. Together, our consultancy team has over 40 years experience in Occupational Hygiene Monitoring, preparing.

Why Do I Need A Safety Statement?

Safety Statements have been required by law of all companies since the Safety, Health and Welfare at Work Act, 1989 and more recently the new Safety, Health and Welfare Act, 2005. The safety statement is effectively a company's documented Health & Safety Management programme for ensuring the safety, health and welfare of all its employees whilst at work. The Health and Safety Authority (HSA) enforces these regulations, and has recently penalised and fined hundreds of companies throughout Ireland for not being health and safety compliant.

A Simple Process...

If you choose to engage Olive Safety to prepare your safety statement, we will provide a personal service that involves one of our consultants visiting your premises or offices to review your operations. The site visit ensures that our consultant accounts for all the potential hazards and risks that your employees may be exposed to during the course of their duties and that all appropriate risk assessments are developed. Our consultant will then prepare a company specific, fully compliant, comprehensive Safety Statement to meet your requirements.

PSDP

Throughout the design process, including alterations to the design, provision is made to eliminate or reduce potential hazards resulting in improved safety performance for construction stage and future maintenance and construction works.

Design Process Safety

Throughout the design process, including alterations to the design, provision is made to eliminate or reduce potential hazards resulting in improved safety performance for construction stage and future maintenance and construction works.

Health and Safety Plan

The Safety Plan prepared by Olive Safety provides a detailed risk assessment of the project and enables the PSCS and Contractor to implement an effective construction safety plan in advance of starting work on site and so reducing the potential for accidents and losses during construction.

Safety File

The Safety File is a key document intended for the safety of end users of the building or those who will extend or maintain the building in future and is effect the building maintenance manual for the completed project. As part of their duties as PSDP, Olive Safety takes delivery of the file from the PSCS and reviews the file for delivery to the client.

PSCS

The PSCS shall prepare for commencement of work on the construction site by, collecting information and documentation from participating contractors and sub contractors in order to identify hazards, document the elimination of the hazards or the reduction of risks during construction and develop the safety and health plan initially prepared by the PSDP before construction commences. The HSA will be notified before construction commences where construction is likely to take more than 500 person days or 30 working days.

Construction Stage Safety Plan

The PSCS shall prepare for commencement of work on the construction site by, collecting information and documentation from participating contractors and sub contractors in order to identify hazards, document the elimination of the hazards or the reduction of risks during construction and develop the safety and health plan initially prepared by the PSDP before construction commences. The HSA will be notified before construction commences where construction is likely to take more than 500 person days or 30 working days.

Organisation on Site

The co-ordination and the implementation of the construction regulations by contractors in addition to organising the co-operation between contractors with the provision of information. This includes such duties as co-ordination of the reporting of accidents to the Authority, the appointment of a site safety representative where applicable, ensure that craft, general construction workers and security workers have a Safety Awareness cards, e.g. Safe Pass and a Construction Skills card where required and appoint a safety adviser where there are more than 100 on site.

Project Safety Management

Monitor the compliance of contractors and others and take corrective action where necessary; notify the Authority and the client of non-compliance with written directions issued; provide all necessary safety file information to the PSDP; the PSCS may issue directions to designers or contractors.

UPSKILL

Expand Your Capabilities

The trend of up-skilling has become very popular in recent times. There are a number of reasons for this: employers want more out of their staff and employees want more out of their job. If you are feeling unhappy in your job why don't you take the reins into your own hands by choosing to up-skill yourself.

Become More Employable

If you are finding the search for a job tough and feel as though you are constantly being rejected or overlooked, you can up-skill to set you apart from the crowd. It could just be that extra qualification or skill you have added to your CV that makes an employer choose you over another potential candidate. If an employer sees that you have taken the initiative to up-skill they will see you as a person with a willingness to learn and be more inclined to offer you a job.

Advance Your Career Prospects

Are you feeling dissatisfied in your job? Perhaps you are happy in your current field but do not feel as though you are getting enough out of the job you are doing. If this is the case you might want to consider investing some time and money into building on your current skills? If you know what you are aiming for you can choose the course that will provide you with the necessary skills.

Become a Valuable Asset

Many people are so grateful to have a job in the current economic climate it has become more important than ever to make yourself indispensable to your employer. If you feel you could be doing more why not ask your employer what areas you could be doing better in. If you have read this far, take the next step and enquire today about what up-skilling opportunities are available to you at Olive Safety.
